

## 36" SELF-UNLOADING CONVEYOR CART

Conveyor Cart hooks to your pickup machine. Dual augers allow maximum utilization of cart capacity. When cart is full, simply use your pickup machine or tractor's hydraulics to unload into our Bankout or Shuttle Cart; which can be done in under 1 minute. The use of a rubber unloading belt greatly reduces damage to the product being unloaded. Cleated belt runs entirely on rollers reducing drag and giving it a long life with very little maintenance.

### SPECIFICATIONS:

- 36" Cleated Belt
